The problem (why we need humans)

“With good quality portrait photos ... for at least 10% of images ... matches become indistinguishable from false positives, and human adjudication becomes necessary.”

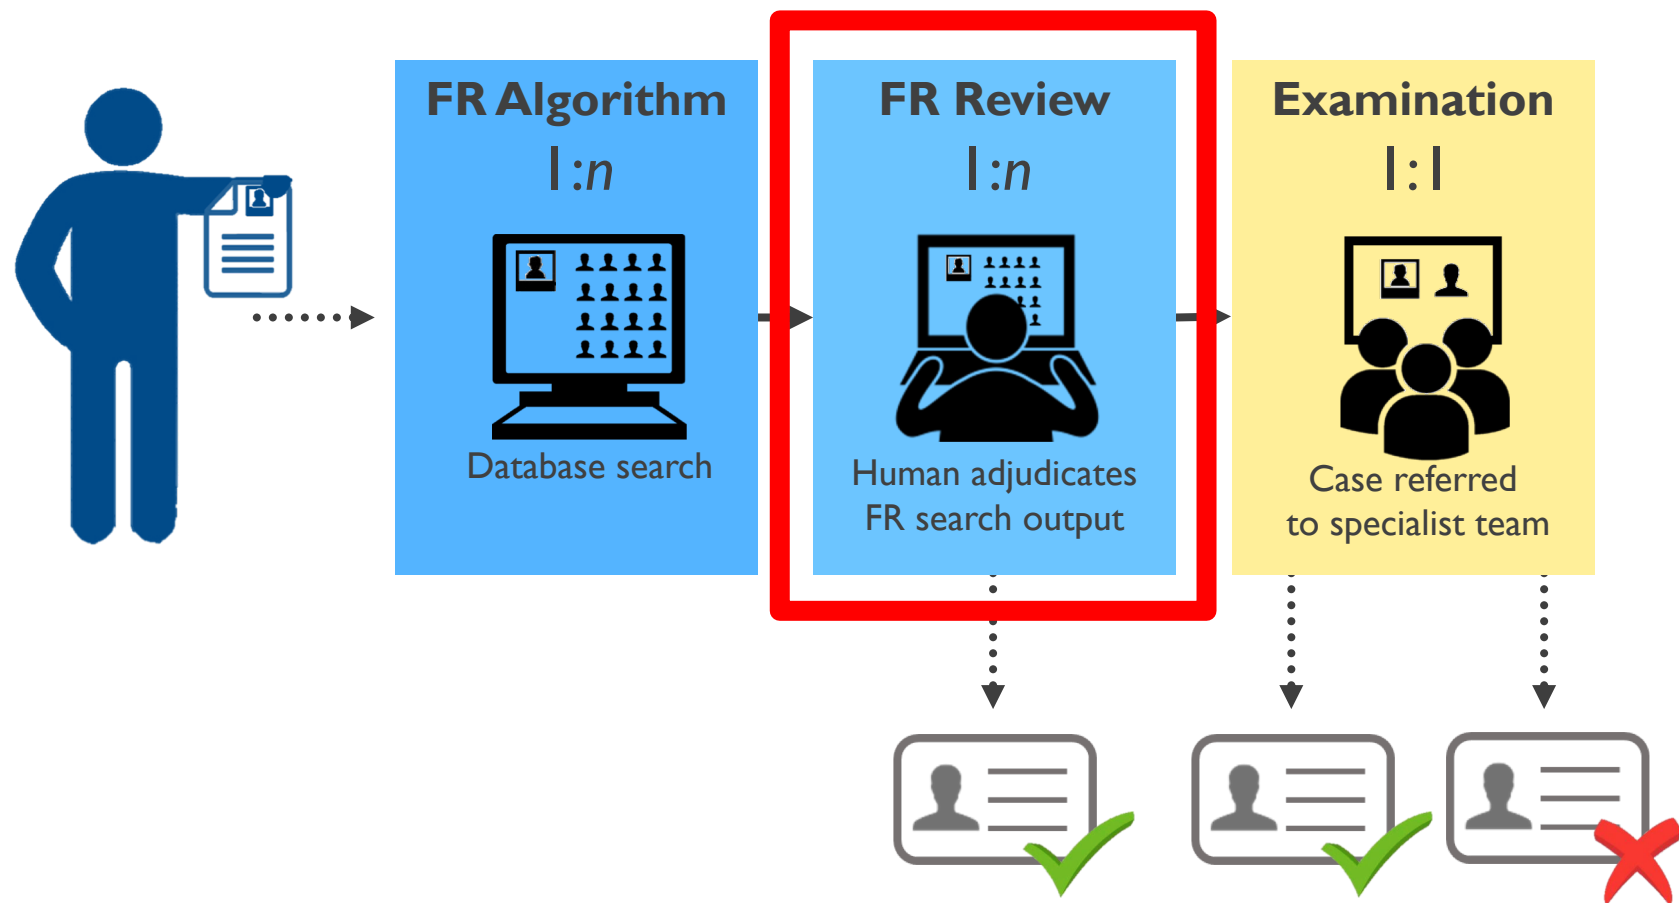

FRVT 2018, Grother, Ngan & Hanaoka

Australian passport issuance FR workflow

Error rates

University students = 50%

Passport office facial review staff = 50%

**“I think everyone in the
Passport Office was surprised...**

... it simply goes against your intuition”

MICHAEL LYNCH
Director Passport Identity Section

HUMAN RESOURCE SOLUTIONS

Staff selection/ recruitment (e.g. White et al. 2015, Balsdon et al. 2018)

Training (e.g. Towler et al. 2017)

Mentorship (e.g. Dowsett & Burton, 2015)

WORKFLOW DESIGN SOLUTIONS

Response ‘fusion’ (e.g. White et al. 2013, Phillips et al. 2018)

Familiarization (e.g. White et al. 2014; Cavazos, Noyes & O’Toole, 2018)

Summary

- Human adjudication of FR candidate lists surprisingly error-prone
- Combination of evidence-based solutions can be used
- Selection/ recruitment provides key advantages over other methods (e.g. training)
- However, selection is not straightforward and large gains should not be expected based on single test
